

以 V 为变量

$$\begin{cases} Ri + V_c = V_s \\ i = C \frac{dV_c}{dt} \end{cases}$$

$$RC \frac{dV_c}{dt} + V_c = V_s$$

以 i 为变量

$$Ri + \frac{1}{C} \int i dt = V_s$$

$$R \frac{di}{dt} + \frac{i}{C} = \frac{dV_s}{dt}$$
